

## ExpoCam Triumphs in Its Return to Downtown Montreal

**Montreal, February 19, 2025** – After more than five years away, ExpoCam made a triumphant return to its home in downtown Montreal, selling out its first edition at the **Palais des congrès de Montréal**. The national trucking show welcomed **8,707 participants**—including **6,855 industry professionals and 1,852 exhibitors across 256 booths**—from **February 6 to 8, 2025**, solidifying its position as the must-attend event for Canada's trucking industry.

Celebrating its **40th anniversary**, ExpoCam upheld its long-standing tradition of bringing together Quebec's trucking sector while also embracing the future. A key highlight of this year's show was the debut of the **Energy Transition Forum**, a dedicated space for exploring alternative energy solutions in trucking. The forum exceeded expectations, thanks to invaluable contributions from **Propulsion Québec and Hydrogène Québec**, who helped educate and engage attendees on the latest innovations in sustainable transportation.

Returning for its second edition, **Garage ExpoCam** proved another major draw, offering hands-on demonstrations of cutting-edge maintenance technology. Partnerships with three Montreal-area mechanics' schools provided a unique opportunity for industry professionals to experience new tools and equipment in action, handled by future mechanics.

Looking ahead, Canada's trucking community will gather next at **Truck World 2026**, taking place **April 16-18 at The International Centre in Mississauga, Ontario**.

ExpoCam will return to downtown Montreal in 2027, continuing its legacy as Quebec's premier trucking event.
